WAYNESBORO NURSERIES, Inc.

WAYNESBORO, VIRGINIA

BRANCH NURSERY: Boxwood Gardens, Afton, Virginia

Fall 1942 and Spring 1943

VIRGINIA'S LARGEST SOURCE OF SUPPLY of dependable Fruit Trees and Ornamentals is offered by the Waynesboro Nurseries after twenty years serving the planters with satisfactory plant material and service.

Our stock and service have been increased and improved from year to year. Improved varieties and methods of culture are added as tested and found practical. So our customers are not only provided with the best in varieties, but are given the advantage of saving in production cost, made possible by modern production methods. While you will find our prices low, our stock is of the highest quality.

OUR STOCK AND PRICES. Being governed strictly by price in buying Nursery Stock is false economy. The best is the cheapest, even though the initial cost may be more. Our prices are based on furnishing vigorous, healthy trees true to name, grown and sold on a small margin of profit and delivered in first class condition. For the benefit of those who are willing to use small sizes of trees and plants and wait for them to grow, we offer the Mail Order Sizes in Shrubs and small sizes of Fruit Trees for less

than Standard sizes. Our small plants and trees are healthy, true to name, and will give satisfactory results. We, however, believe in most cases it is economy to purchase medium or larger sizes.

CERTIFICATE OF INSPECTION. Issued by Virginia State Entomologist, furnished with each shipment.

TRANSPORTATION. We are located on two trunk line railroads and also have motor freight lines out of Waynesboro, affording the best of transportation service.

PRICES. The prices quoted are f. o. b. our shipping point or for local delivery on our regular truck routes. We make no charge for packing and delivering to our local freight, express, or motor freight office.

TERMS. Cash with order unless otherwise arranged.

REMITTANCES. Remittances may be made by Postal Money Order, Express Money Order, or your personal check, if you prefer.

LIBERAL REPLACEMENT TERMS. While losses from transplanting our vigorous,

carefully handled stock are at a minimum, there are always some losses to be expected, regardless of how careful both Nurseryman and planter may be. We agree to share with our customers any losses from transplanting our stock by refunding at half catalogue list price any plant material reported dead within twelve months after date of delivery, provided the original purchase was paid for as per sale terms and the plant material has been given reasonable attention.

VARIETIES AND QUANTITIES. In case you do not see listed the variety, quantity, or size desired, write for further information.

MAKING UP ORDERS. Do not fail to give sizes, quantities, and varieties wanted. Also give shipping point if different from post office, and approximately when you would like your stock shipped.

NOTICE OF WARRANTY. While we are very careful to keep our varieties true to name, in the event they should prove otherwise, we cannot be responsible for more than the amount we receive for the stock.

FRUIT TREES

Planters in various communities demand different sizes and varieties, so we offer a large list of both. All of our stock is clean, healthy, true to name, and bears a State Certificate of In-

spection. Our list of varieties is carefully worked out. Whether you are planting a commercial orchard or a small home orchard, you can make a suitable selection from our list.

Red June. Well known early Summer variety.
Rome Beauty. A well-known striped Winter Apple. Very near sweet.
Smokehouse. Aug.-Sept. Striped. Favorite home orchard variety.

STANDARD VARIETIES

Albemarle Pippin. Yellowish green. Winter. Baldwin. An old-time Fall home orchard variety in the South.

Ben Davis. Well-known red Winter Apple.
Bonum. Red Fall Apple, medium size. Well known.

Cortland. A member of the McIntosh family. Larger, later, and better keeper.

Delicious. Red and green striped. One of the best known Winter varieties. Excellent quality.

Early Harvest. Well-known early greenish yellow Apple. Good in its season.

Fall Pippin. Yellow. An old-time Fall Apple having a place in every home orchard.

Grimes Golden. The most popular late Fall and early Winter yellow Apple.

Grimes Golden, Double Worked. 2 yr. only. Lives longer than the standard trees. 10c extra per tree.

Hyloop Crab. Excellent for jellies.
Jonathan. A late Fall, red Apple. Much in demand.

Lady. Small, golden background, red blush; highly flavored; excellent quality. Demands unusually high prices, having sold for as much as \$20.00 per barrel on U. S. markets. Trees very scarce. 10c extra per tree.

Liveland Raspberry. Medium sized. Striped. Midsummer. Excellent quality.

Lodi. An improved, larger Yellow Transparent. Lodi. Beautiful dark red Winter Apple, enjoying the reputation of selling for the highest price of any Apple grown in Virginia. Demands the highest prices on markets wherever known. In 1939 in local orchards the first crop of bloom was killed by a late frost, but the trees bloomed the second time and produced a full crop of fruit.

Macoun. Dark red, good size, rich flavor. Introduced by New York Experiment Station. Regular bearer.

Maiden Blush. Favorite Midsummer home and commercial variety. Golden background, red cheek.

Mammoth Black Twig. Large, dark red. Long keeper. Good quality. Rather shy bearer.

McIntosh. A red Winter variety in New England States, late Fall in Virginia.

Milton. Belongs to McIntosh family but ripens a month earlier.

Mother. Medium sized. Red. Late Fall.

N. W. Greening. Yellowish green. Winter.
Paragon. Resembles Black Twig, but is more abundant bearer.

SAVE TIME IN GROWING FRUIT by planting our Super, Giant Size, and Specimen Apple Trees which have been twice transplanted, carefully pruned, and will afford fruit in a shorter time than the younger, smaller trees. We especially recommend the Super, Giant Size and Specimen Trees for home orchard planting and for replanting in commercial orchards where cross pollination is needed. The varieties marked † we can furnish in both 4 yr. 6-7 ft. Super Size and 5 yr. Sizes. ASK FOR PRICES ON B&B TREES.

NEW RED STRAINS

For the first time being offered at Standard Variety Prices.

YORKING

On May 28, 1935, was awarded United States Patent No. 125.

A New Solid Red York having all the good qualities of the famous old York and the tremendous advantage of being a Solid Red, a pleasing purplish red, and coloring two weeks earlier than the standard York. Yorking is one of only a few Apples ever to be honored with a United States Patent. You can imagine what a Solid Red York—every Apple on the tree being a solid, bright red—would mean to the grower. That is exactly what we offer in the Yorking.

In Spring 1941 No. 1 Yorking Apples sold to one of our local chain stores for \$2.00 per basket, when the top price on No. 1's in other varieties was \$1.50. Trees only 10c above other varieties.

NEW SOLID RED DELICIOUS (Northwestern Strain)

A "Super" Delicious. An Apple with all the good qualities of the Common Delicious: Same size, same shape, same flavor, same texture and same ripening period, but the New Solid Red Delicious colors two to three weeks earlier and colors solid red without trace or sign of stripe, even into the stem and blossom ends.

VANCE DELICIOUS

A strain of the New Solid Red Delicious differing from the standard New Red Delicious by coloring earlier. We consider this the best of all the New Red Delicious Strains. 10c extra per tree.

NEW SOLID RED STAYMAN

Sport of the well-known Stayman, having all the good qualities of the Common Stayman and the big advantage of being solid red in color instead of pale striped greenish coloring found in the Common Stayman. Write for further information.

NEW SOLID RED JONATHAN

Same size, quality and shape as Common Jonathan and differs only by coloring two weeks earlier and coloring solid red.

NEW RED ROME

The Northwestern Strain of Red Rome, listed by some as C&O. Red Strain. Now extensively planted in the East.

GALLIA BEAUTY

Pronounced by many as best of the New Red Rome Strains.

NEW RED DUCHESS

Differs from the Standard Duchess by having more color and coloring earlier in the season.

NEW RED SPY

Same as Northern Spy with the exception of being a solid red.

Our Trees Double Inspected

PRONOUNCED FREE OF DISEASE

by Virginia State Entomologist

PRONOUNCED TRUE TO NAME

by Professor Shaw, A National

Authority on Identification

of Varieties

Professor Shaw, Mass. State College,

reports:

"TO WHOM IT MAY CONCERN:

This is to state that all the saleable apple stock now growing in the nurseries of the Waynesboro Nurseries, Inc., near Waynesboro, Virginia, have been examined for truthfulness to name by A. P. French, O. C. Roberts, and L. Southwick and, as they now stand in the nursery row all trees are, to the best of our knowledge and belief, true to name.

(APPLES, Standard Varieties— Continued.)

Stayman. One of our most popular commercial Apples of the Winter varieties. Large, red, green striped.

Summer Rambo. Undoubtedly one of the best Summer varieties of its season. Large striped, excellent quality. Ripens in August.

Summer Yellow Delicious. A Golden Delicious which ripens in July. Most promising New Summer Apple known.

Sweet Paradise. Most popular Fall sweet Apple.

Turley. Somewhat resembles Stayman but has better color and is larger. Does not crack. Yellow flesh. More regular bearer than the Stayman.

Town Talk. (Quintuple Tree). Five varieties growing on one tree. See General Catalogue for description. 3 yr. 5-6 ft., \$2.50 each, two for \$4.50, five for \$10.00.

Quadruple Tree. An Apple Tree on which four varieties are grafted, ripening early Summer, late Summer, Fall and Winter—affording fresh fruit over a period of several months. A 3 yr. tree, 5 to 6 ft., \$2.00 each; 2 for \$3.50.

ESPALE FRUIT TREES—Write for special folder and prices.

Virginia Beauty. Resembles Delicious in quality and shape; darker and extra fine quality.

Williams Early Red. One of the largest early Apples ripening in July. Excellent home and commercial variety.

Winesap. Standard commercial variety, medium size. Solid red.

Winter Banana. Large golden yellow Fall variety of excellent quality.

Yellow Delicious. Resembles Grimes Golden but larger, more prolific and earlier bearer.

Yellow Transparent. The earliest Apple on our list. A very popular early Apple. Medium size and excellent for cooking purposes.

York Imperial. Most extensively planted Apple in Virginia. It is now being displaced by Yorking, the Solid Red York.

Triple Tree. Three varieties on one tree—early Summer, Fall, and Winter. 3 yr. 5-6 ft., \$1.50 each, two for \$2.75.

PEACHES

A GOOD TIME TO PLANT PEACH

Peaches have always been a quick money crop and one of the most profitable fruit crops. Planting at this time on suitable land should prove profitable.

MUCH DEPENDS ON THE TREES YOU PLANT

Our Peach Trees are budded on the old-time native hardy seedling Peach, giving them the best root system possible and our buds are cut from bearing orchards, assuring our customers of trees true to name. Our sandy loam soil is also conducive to a vigorous, fibrous root system. Our modern tree digger enables us to dig trees with all their roots. Our experience in growing many million trees has taught us how to handle and deliver in such condition that the best of results may be expected.

With the many advantages we have in growing Peach we can quote our trees at very reasonable prices, seldom costing more than trees you could not afford to plant.

For your convenience we are listing our Peach in ripening order. If more complete descriptions are required write for Free Copy of our 44 page Planting Guide or consult our local representative.

PECANS

Mahan. 4-6 ft., \$5.00 each, \$50.00 per doz.

PAFER SHELL. Large. Bears young, makes good yield. 2-3 ft., \$1.50 each; \$15.00 per doz.

STUART. 3-4 ft., \$2.00 each; 4-5 ft., \$2.75 each.

STRAWBERRIES

There is more variation in the price of Strawberry plants than most Nursery Stock. Why is it? There is a reason. Some dig plants from old bearing patches and sell the plants as a by-product. They must necessarily be sold at a low price as the more experienced planters will not use such plants. Hence such growers must find customers who buy where the cheapest plants are to be had, regardless of whether they are old or new. We agree to furnish at half list price plants for replacing any plants which may be lost the first season from causes beyond our control.

Varieties are listed in ripening order, so you may make a selection ripening from the earliest to the latest.

FAIRFAX—Early, prolific, unusually productive, large and firm. Introduced by U. S. Department of Agriculture.

DORSETT. Another U. S. Department of Agriculture introduction. Early, productive, frost resistant, large, firm. One of the most promising new varieties.

Klondyke. An old favorite. Early, sweet. **Premier**. The most popular commercial variety. Good size, excellent quality. **Blakemore**. Recommended by Department of Agriculture as an outstanding new variety. Supersedes Premier in yield and quality. **Aroma**. ORNAMENTAL and LANDSCAPE DEPARTMENT

A Plain House Planted Makes an Attractive Home.

From our list of choice Shrubs, Evergreens, Shade Trees, Roses, Tuberous Plants, and Perennials, a selection can be made suitable for any requirement.

Landscape Service. We employ professional landscape architects and practical, well trained field men whose services are always available for our customers. If we can be of any service to you, do not hesitate to call on us. Our standard grade of stock is grown chiefly

for the larger landscape developments and is not to be compared to light Mail Order Grades often quoted. Even the smaller stock we list as "Mail Order Grade" is well rooted, branched, and much of it will give immediate effect.

Make use of our Landscape Department. We have established it for your benefit and it is at your command. If too far away for one of our landscape men to see you, send in measurements of your grounds and a photo of the house for suggestions.

PRIVET HEDGE

Amur River, The New Evergreen
Type Hedge

A Privet hedge is much cheaper than a fence and is far more attractive. It not only serves the purpose of a fence, but is decidedly more ornamental. Plant in a straight row six inches apart. Cut back to within three inches of the ground when transplanting and you will have a dense, compact hedge within a short time.

AMUR RIVER PRIVET (Evergreen)

New evergreen. Southern type. Makes a very dense compact hedge, resembling Boxwood. It holds its foliage throughout the average winter.

EVERGREENS

We take pride in our Evergreens and our method of preparing them for our customers. We shear carefully to make them uniform, compact specimens. In preparing for shipment, we dig the plants leaving about the roots the soil in which they were grown, binding it firmly with burlap and heavy cord—disturbing the roots as little as possible.

ASK FOR QUOTATIONS ON GARDEN FURNITURE.

The New Soil Conditioner and Plant Food. "Rho-Za-Grow" has taken the guesswork out of Rhododendron growing.

Rhododendrons and their kindred Broad-Leaved Evergreens, the Azaleas, Kalmias, Andromedas, etc., are lovely things, but many planters hesitate to plant these aristocratic American Shrubs because of their exacting soil requirements.

"Rho-Za-Grow" is a scientifically balanced soil conditioner and plant food. Use it on all plants requiring such soils. "Rho-Za-Grow" contains exactly the proper balance of acids, neutral plant food, and humus. It soaks and lightens the soil, and it has high plant food content.
